Education Planning

At the Australian Scholarships Group (ASG) we understand the importance of early planning when it comes to your child's education. That's why we make it possible for you to begin building a nest egg for future education expenses at a time when it's more affordable and convenient to do so.

If you have a child under ten years old, are expecting a child, or even planning to have a child in the future, ASG's Education Program can help you to give them a head start by enabling you to tax-effectively prepare for the costs of their primary, secondary and post-secondary education. It's a simple, disciplined and affordable program that ensures you have money available for their education when you need it most.

Education Options

All parents are faced with the decision of choosing the right school for their child and this decision should be based on the child's needs, not on your budget. Furthermore, your child's ability to pursue their career of choice should not be compromised by the rising costs of post-secondary education.

That's why it's important to begin planning early, because the more you can save before your child reaches school age, the more options you will have when it's time to make education choices.

About ASG

ASG was established in 1974 as an independent, not-for-profit friendly society, dedicated to helping parents, and now parents-to-be, prepare for the future costs of their children's education. More than 350,000 ASG Member parents have benefited from ASG's specialist education programs and the additional support ASG provides to motivate children to participate in education to the full extent of their ability.
